Speaking: FTT Track II (Embedded) (Host)

Mar 29, 10:36

Viewing FTT Track II (Embedded)'s screen

```
1 #include<stdio.h>
2 #include<string.h>
3 #include<sys/ipc.h>
4 #include<sys/types.h>
5 #include<sys/msg.h>
6
7 struct msgbuf{
8     long mtype;
9     char data[512];
10 };
11
12 int main(int argc, char *argv[]){
13     struct msgbuf v;
14     int id;
15     /*argc !=3){
16         printf("usage... ./mq_tx msg_type data \n");
17         printf("Example: mq_tx 5 \"hello\" \n");
18         return 0;
19     }*/
20
21     id=msgget(55, IPC_CREAT|0644);
22     /*if(id<0){
23         perror("msgget");/// ./tx 12 linux\0
24         return 0;
25     }*/
26     printf("id = %d\n",id);
27     v.mtype=atoi(argv[1]);//12 //Argument 1 is type of message conve
28     strcpy(v.data, argv[2]); //Argument 2 is message
29     msgsnd(id, &v, strlen(v.data)+1, 0);//Flag IPC_NOWAIT
30     //perror("msgsnd"); // ".wrt" "type" "data"
31     return 0;
32 }
